### Digital dentistry and Private Dentistry Show

15<sup>th</sup> September Olympia. Visit us on stand D3 to see our digital offerings and meet the Implantium and ImplantGuidePrint team.

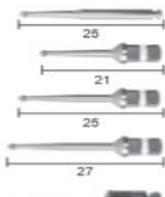

### ORA-AID ORAL PLASTERS

Ora-aid plasters are cut to size and placed over the sutures or wound. They have the same feel as a blister plaster and are only applied for 6 -12 hours when they are easily removeable by the patient before sleeping. Aimed to stabilise the intial clot formation and stop the ingress of food and bacteria. Priced from £50 plus vat for a box of 25. Great feedback so far from patients.

#### Angled Hex Driver

| Type       | L  | Art. No. |
|------------|----|----------|
| Hand-piece | 25 | XAD 25 H |
|            | 21 | XAD 21 W |

Angled screw drivers £53.54 plus vat

*Bright your Life!*  
**Bright** toothbrush

## 18MM SUPERLINE IMPLANTS

We have these available in diameters of 3.6 4.0 and 4.5 Priced at the same unit price as conventional lengths and can be part of your deal.

## BRIGHT TOOTHBRUSHES

We will be shortly releasing a great new product from Genoss which we will be marketing to practices to sell to their patients. These will be a cost competitive alternative to other sonic toothbrushes on the market and they look attractive too. The RRP to the patients will be around £30.

*Choice of heads and great colours*

## DIGITAL UPDATE

We now have updated DME files and STL files for the new healing abutment scan bodies/ flags.

Please ask your labs to contact us so we can ascertain their requirements and send them the libraries.

Our sister company ImpantGuidePrint is now producing guides for digital surgery and we can help with the whole process if required. Feedback about the full guided Dentium kit is excellent and we have guided implant deal options if you want to get going with it. We will also lend you a full guided kit for your first case.

To discuss any of the above please call the team on 08450176262 or drop us an email at [info@implantium.co.uk](mailto:info@implantium.co.uk)
